IAKIV PEKARSKYI
Junior Front-end Developer

SUMMARY

I am a junior front-end developer with experience both in front end and backend development looking for my place in IT industry. I tend to challenge myself very often and can adapt to very wast range of situation. With my previous experience as a teacher I can easily deal with big loads of stress and as photographer I tend to find creative ways of solving problems. I would be glad to join your team to make other peoples lives better.

PROJECT EXPERIENCE

Iced-Latte, Link GitHub [Next.js, Typescript, Zustand, TailwindCSS]
Front-end that simulates the operations of an coffee online shop. Built using Next.js, it's crafted for educational purposes, offering insights into modern application development with Next.js.

Cows Shelter Website, Link GitHub [Typescript, TailwindCSS]
A website for a shelter for cows in Ukraine. Created responsive and user-friendly interfaces. Optimised both frontend, ensuring fast loading times..

Water tracker, Link GitHub [JS, Redux toolkit, StyledComponents,]
An app with functionality to record daily water intake and track With register and login functionality and secure authentication. With dynamic data update.

Filmoteka, Link GitHub [JS, API, routing]
Web application for choosing a movies. App component with Public and Private routes, AuthPage page logic, pagination.

Phonebook, Link GitHub [React, Redux, CSS]
Currently working with forms, mastering routing, learning how to work with hooks. The project also meant learning to read the documentation.
